Professional Development Day
April 12, 2008

The Power of Project Management

Find out how to unleash the Power of Project Management to impact your organization and your career! Join us for this full day event and earn up to **8 PDUs**.

We'll have 3 incredible keynotes:

Chuck Tryon on “What’s So MODERN About PROJECT MANAGEMENT?” Many organizations are finding that the Project Management skills they developed for one type of work are conflicting with and complicating newer project types. The resulting culture clash frustrates everyone involved and often dooms viable projects. While both types of projects coexist in most companies, focus is shifting away from traditional, predictable efforts toward high-risk Single-Time Efforts where the unknowns overwhelm known information. Chuck Tryon contrasts the assumptions of the Continuing Efforts and Single-Time Efforts. He also identifies some of the most critical issues Information Age organizations must address.

Ron Black on “Acrobatics for Overachievers: *The Art and Science of Managing Multiple Projects and Priorities*” Designed for today’s ultra-busy professional, this seminar provides the essential skills and knowledge needed to create balance, increase productivity, and improve our sense of well being at work. It combines the essential elements of project management, time management, and organizational skills with the latest research on multi-tasking, sleep, and other performance affecting choices, into an interactive and entertaining experience.

Drum Café uses the universal languages of music and rhythm to energize, motivate and entertain! The effect of the drumming, among other things, is a synchronization of energy, unity, and common vision/purpose. When you hear the rhythm of a group drumming and contribute your own beat, you are listening and playing....receptive and creative at the same time. The Drum Cafe has done nearly 5,000 events in 19 countries over the past 10 years.
